The Thoughtful Design Innovator.

Do you remember the last time you opened a gift that made you say "Oh! How did you know? That's exactly what I wanted!" That's the kind of feeling that the designers at Electrolux seek to evoke in everyone who chooses or uses one of our products. We devote time, knowledge, and a great deal of thought to anticipating and creating the kind of appliances that our customers really need and want.

This kind of thoughtful care means innovating with insight. Not design for design's sake, but design for the user's sake. For us, thoughtful design means making appliances easier to use and tasks more enjoyable to perform, freeing our customers to experience that ultimate 21st century luxury, ease of mind. Our aim is to make this ease of mind more available to more people in more parts of their everyday lives, all over the world.
So when we say we're thinking of you, you know we mean just that.

Electrolux. Thinking of you.

Electrolux. The thoughtful design innovator.

Our vision is of a thoughtful home. A home where everything is designed with intelligence and understanding. Where everything works beautifully, simply and intuitively. Where people's lives are easy and relaxed. At Electrolux, we are doing our best to make this happen every day.

Our philosophy is one of thoughtful design. Our products are designed with you in mind.

The Electrolux promise:
Designed through perceptive insight, observation and personal experience of how our products work. Electrolux are the thoughtful design innovator, providing the best experience and delivering superior ease of mind.

We were thinking of you when we made it.
We want our products to speak a language that is intuitively understood and when they speak we want them to reflect..."We were thinking of you when we made it".

Electrolux Professional.
With the highest research and development investment in its industry, Electrolux Professional is a world leader in the production and distribution of professional food service and laundry solutions. Electrolux is committed to thoughtful innovation for all its customers.

It’s great when everything comes together.

At Electrolux we have launched Global Design. It is a new design concept emanating from trends in everyday life, which affect modern people in a modern society. Here we present a wide range of products for quality-conscious people with somewhat varying preferences. It contains three different levels of products: **Insight, Inspire and Intuition.**

Appliances that make the kitchen work for you.

INSIGHT

Many people want things that they feel proud of. Things that impress you and give you a sense of sophistication. If you are that kind of person our Insight products are made for you. It stands for extremely innovative, top-of-the-range appliances, which combine the latest technology and the most advanced design. These appliances are made for demanding people, who won’t settle for anything but the best.

INSPIRE

Some people are looking for solutions out of the ordinary. They are keen on digital interfaces and smart technical solutions. Are you that kind of person? If so, Inspire represents your kind of products. Electrolux Inspire stands for innovative products not too far from the frontline of technological development. It is an inspiring group of products, great options and gorgeous design.

INTUITION

Our ambition is to meet people’s preferences and dreams. This has among other things resulted in Electrolux Intuition - a group of products for you, who appreciate high quality, functionality and stability. You are looking for things that are not too fancy, but reliable and good. These appliances are made for you, who value basic function and genuinely good design.

Thinking of you

Electrolux

46220 D GA 2007 Electrolux Built-In 29/5/07 3:37 pm Page 8

We were thinking of people who would love our stunning new design of ovens.

The new Built-in range of ovens features a stunning new design in line with today's and tomorrow's kitchen trends. The design is distinct, with a host of new features including light bars, keep warm function, Multi-Function oven with steam and easy to use interactive displays, all because Electrolux is "Thinking of You".

Insight range

Unique 'light bar' makes this product a focal point in any kitchen - packed with features to offer you many different cooking options.

Including:

- Multi-Function with up to 15 functions
- Temperature probe
- Menu guided cooking and interactive cooking displays
- Plus at this level you will also discover, pyrolytic, steam and Electrolux's unique heat and hold feature.

Inspire range

A stunning new Global Design featuring glass fascias and a linear look.

Including:

- Electronic clocks on all models
- Some ovens feature catalytic liners to make cleaning that little bit easier.

Intuition range

Features the fresh, new Global Design - complementing today's modern kitchens.

Including:

- Static or fan oven
- 'A' energy rated.

Energy Efficiency

All single ovens are 'A' rated for the very best efficiency.

Electric & Gas Single, Double & Built-Under ovens

A choice of ovens.

The oven is no doubt one of the most important appliances in your kitchen. Choosing the right oven to suit the space you have and the way you want to cook is key to the success of your new kitchen. A single oven has a combined grill and is ideally suited for installation in-column or beneath a hob. A double oven is installed at eye level which is the most convenient working height.

The two cavities mean you can use the oven and the grill at the same time, or you have a second oven, perfect for everyday meals or entertaining friends & family. If you want the convenience of a double oven but do not have the space, then the built-under ovens are the perfect solution. Cleverly designed to replace a single oven and its housing, they offer double cavity cooking in the space of a single oven.

We were thinking it doesn't just take a great chef to get great results - it takes steam.

The Electrolux Combination Oven. Chefs have a secret that helps them create food that's crisp and golden while at the same time being delicious and succulent. It's called combination cooking. Hot air and steam combine to deliver extraordinary results – in both taste and presentation. Restaurants have had this advantage for years. Now it's your turn.

Electrolux introduces a Multi-Function oven with steam… the healthier way to cook.

Electrolux have a solution with the only **full size single multi function oven with steam** - combining traditional cooking with all the healthier benefits of steam, retaining all the flavours and nutrients in the food (reducing the need for fat and salt) with the ability to give golden crispy results.

- Steam cooking retains the nutrients and vitamins within the food - also the colour and texture.
- Steam and conventional heat give fantastic cooking results which look good enough to eat.

Steam levels

Full steam	Ideal for vegetables, rice or anything you would generally steam.
Partial steam	Combines steam and heat and is perfect for cooking your roast chicken, bread or anything you want crispy on the outside whilst retaining the moisture.
Half steam	Perfect for reheating without drying.

Built-in Ovens

Functions

Are you a person who has a passion for cooking and who loves to entertain friends and family with the result? Electrolux offers a wide range of functions that will help you to cook the perfect meal, just the way you like.

Ultrafan®
An Ultrafan® oven makes use of a fan to gently circulate the heat evenly around the oven. The fan is at the back of the oven surrounded by a heating element. This clever design gives faster heat up times, shorter cooking times at lower temperatures and an even cooking temperature throughout the oven. As well as being ideal for batch baking, or cooking on more than one shelf, it ensures there is no transfer of flavours, so sweet and savoury dishes can be cooked together.

Multi-Function
Allows you to choose fan cooking, conventional cooking and grilling, as well as combining other oven functions such as the pizza setting. They're all combined in one oven to make your life easier.

Conventional Cooking
This method of cooking is perfect for your favourite recipes to be cooked in the traditional way, using top and bottom heating elements. This makes it particularly good for cooking pastry, cakes or for one shelf cooking.

Turbo grilling
This gives an authentic spit roast effect without needing to baste or turn the joint. It combines the grill and the fan to give a crisp but tender result.

Top heat
Perfect for browning dishes such as shepherd's pie or lasagne.

Defrost
The fan simply circulates the air around the oven. This allows you to defrost food quickly and hygienically in half the time without having to use a microwave.

Fast heat up
Quickly heat your oven to the required temperature saving you time.

Pizza setting
This is the ideal way to ensure a nice crispy base with a succulent, melted topping every time.

Bottom heat
Ideal for crisp pastry bases, reheating food, and if used at a low temperature, for warming plates.

Single and dual circuit grill
All ovens offer traditional grilling with variable control. The dual circuit grill may be used on the economy setting when grilling smaller items as it only uses part of the grill.

Temperature probe
The temperature probe allows you to measure whether the joint is ready without even opening the oven door. It takes the guess work out of meat cooking and is ideal for Beef Wellington. Whilst this is a new method of cooking for most people, you'll soon be so used to a perfectly cooked joint, you'll wonder how you ever managed without it.

Thinking of you

Built-in Ovens

Features

We present appliances with design, features and performance in a class of their own. We have got all the features you could wish for because we were thinking of you when we developed these appliances. We were thinking of making your kitchen life a little bit more relaxed and fun.

We were thinking
you might enjoy time to do other things.

Pyrolytic
HEAT CLEANING

Pyrolytic Cleaning - ovens that clean themselves

It's the only cleaning function that cleans **all of the oven** - top, sides, door, light and oven base - plus it's efficient, and extremely safe to use with the oven being designed around the pyrolytic function - rather than the other way round.

- Pyrolytic ovens remove the need for you to spend your time cleaning your oven by hand
- It is more friendly to the environment as you do not need to use cleaning products on your oven.

Catalytic liners - to help your oven stay cleaner

A special Catayltic coating is used on many of the ovens which absorbs any splashes during cooking to help keep the oven cleaner. When the oven is set to its highest temperature the special coating then helps clean off the splashes.

Easy to clean enamel

With a durable high gloss enamel interior making it easier to wipe away grease and spillage immediately after cooking. The new construction of the door in single ovens allows you to remove the door and the glass for very easy cleaning.

Light bar

Creates a soft look, and a focal point in the kitchen with this stunning light bar and design, to complement today's modern kitchens.

Interactive/menu guided display

With interactive control the oven can guide you through your cooking process. It makes programme selection simple. Also it has built-in recipes to make life even easier. If you want to leave the cooking to someone else you can even programme your favourite dish in to the oven and all the timings will be held. This feature also tells you when to clean your oven.

Heat and Hold

A great, unique feature which is aligned to today's busy lifestyles - this function keeps food warm in the same way a hostess trolley would - maintaining the temperature at 80 degrees to prevent drying or condensation build up.

Safety for you and your family

The inner and outer panes of glass in our oven doors are heat reflective, and depending upon the model chosen, two, three or four panes of glass are used in total to ensure the outer door temperature is cooler. This reduces the risk of injury, giving you peace of mind, as well as making the oven more economical to use. Thoughtful features like auto-stop, anti-tip shelves ensure your oven is safer to use. Many models include a grill guard to prevent you accidentally touching the grill element.

Baking chart

In some Insight single ovens there is a baking and cooking function guide which helps you to choose the right way to cook your food.

We were thinking of
making your cooking meet your ambition.

The menu guided recipe cooking oven. Select the weight and what you're cooking from the display. The oven tells you what shelf to use, what temperature to choose, and how long it will take. It also gives you Pyrolytic cleaning, so you can clean your oven at the touch of a button. When dinner is ready, it tells you that too, so you can add a little variety to your menu and always count on delicious results.
